AI Workflow Productivity & Process Transformation

For organisations in Kenya

Hours saved every week, with the risks managed

Hours saved on routine work

Teams use AI for first drafts of reports, emails, meeting notes and summaries, and spend the time saved on work that needs judgement.

Consistent, checked quality

Shared prompts, templates and human review steps keep AI-assisted work accurate and on-brand across departments.

Governed, audit-ready AI use

Clear rules on approved tools and on the data that never goes into AI, so you can show auditors and the board that AI use is controlled and in line with Kenya's Data Protection Act, 2019.
